

**New Jersey Turnpike Authority
Operations Department
Advanced Traffic Impact Notice**

Date: November 17, 2011

Project: New Jersey Turnpike Contractor Activities

Route/Direction/MP: New Jersey Turnpike Newark Bay Hudson County Extension (NBHCE) Eastbound and Westbound

Municipality/County: Bayonne (Hudson County) to Newark (Essex County)

Nature of work: Complete rehabilitation of concrete decks and joints on Structure No. N2.01. Work entails complete replacement of the superstructure.

Description of New Traffic Pattern: The following traffic pattern change will be occurring during the overnight hours on Friday November 18, 2011 into Saturday morning November 19, 2011:

The present traffic pattern along the Eastbound NBHCE will not change, however the emergency pull-offs will be eliminated along the entire length of construction in this direction. The present traffic pattern along the Westbound NBHCE will change, with all traffic being shifted to the south (to the left) from Interchange 14A to Interchange 14. Emergency pull-off shoulders will be available along the westbound direction for disabled vehicles.

Anticipated Traffic Impacts: It is anticipated traffic impacts will be moderate to severe between 6A – 9A and 4P – 7P Monday through Friday along both directions.

Proposed Start Date of New Traffic Pattern: The new traffic pattern will be in place for at least 10 months.

Any other comments: NJDOT will activate overhead VMS on Route 139. TRANSCOM has been advised and has requested support from the PANYNJ Bayonne Bridge and Holland Tunnel, as well as NYCDOT and NYSDOT, for these activities. Coordination has occurred with the City of Bayonne.
